“AT HOME” WART TREATMENT

1. Apply Duofilm liquid or Occlusal liquid to wart and 1-2mm of surrounding normal skin.
2. Cover with 3M waterproof tape or the tape portion of a band-aide.
3. Leave on for 3-4 days – even while bathing.
4. Remove after 3-4 days and file down with 1 inch cut piece of nail file.
5. Throw away file after each use to avoid spreading the virus.
6. Re-apply Duofilm or Occlusal liquid and repeat steps 1 - 5 until wart is gone.

If pain/tenderness occurs, stop Duofilm or Occlusal liquid for a few days and then resume.

If persistent pain occurs, please call the office.

Supplies needed:

- Duofilm or Occlusal liquid
- Band-Aids or waterproof tape
- Disposable nail files (cut into 1 inch pieces)
